Educational Activism
The Media is My Message

- **The World is Flat 3.0** (connectedness & globalization)
- **Wisdom of Crowds** (many vs. few; finding the right crowd)
- **Waiting for Superman** (there’s an app for that)
- **Race to Nowhere** (achievement at what cost?)
- **Train Your Mind, Change Your Brain** (neuroplasticity)
- **The Singularity is Near** (non-biological intelligence)

Educational Activism
Compelling Reasons

1. Economics and age demographics
2. Global connectedness (health, environment, economic, security)
3. Information pollution (too much, unfiltered)
4. Workforce development (critical skills)
5. Collaborating our future (possible, preferable, preventable)

  - Sequential Creation
  - Virtual Meeting or Gathering
  - Simulation
  - Social Action
  - Intercultural Exchange
  - Travel Buddy
  - Global Classroom
  - Impersonation
  - Electronic Publishing
**Collaboration Types**

**Pooled Data Analysis**
These projects involve the collection of data at two or more sites which is then combined for further analysis. Projects that require lots of data that can be collected by numerous classes are especially suited to this type of collaboration.

**Social Action**
These are action-oriented, multicultural humanitarian projects that seek to accomplish beneficial results in specific locations. They can focus on environmental issues, endangered species, human welfare, or any other topic where there is an important contribution to be made.

**Information Exchange**
Collect and exchange information on a specific topic or theme: animals and insects, rocks and geology, water quality, medicinal plants, weather, astronomy, seasonal observations, historic trees... anything that can be studied is fair game.

**Travel Buddy**
This is a specific type of Keypal or Global Classroom project that involves the classroom exchange of one or more stuffed animals or toy characters. These projects foster a rich array of writing activities among all students, including reluctant writers, and are very popular. Visit our classic Woodsy Project for more information.

**Sequential Creation**
Classes create something—a poem or story or narrative, a picture, sequentially by passing the creation from one class to the next. Each class adds or modifies the creation and then passes it along. When it’s finished, everybody shares the finished product.

**Electronic Publishing**
These projects publish original student creations: writing, research, art, music, etc. Many publishing formats are used: online magazines, anthologies, newspapers, web sites or galleries that feature student-created work.

The River Rouge Watershed-Ours to Protect!!

Do you live in the River Rouge Watershed? Then you are a member of our community! We determined our community by the natural boundary of the River Rouge Watershed. We decided that this was our community because everything that everyone does within the watershed can have negative or positive consequences on the environment both locally and globally. We wanted to find out all about our community so we researched the history of our watershed and learned about what is going on in the watershed today. We thought about the future and realized that the future of the River Rouge Watershed's environment, land use, water quality and economy depends on the decisions that we make today as decision makers of tomorrow. We decided to learn how to become better stewards of the watershed and
In a world full of problems, our destiny will be determined by Solvers - the people who see a problem as an opportunity to do something great. Solvers have the power to change reality rather than simply accept it as is. By participating in future-thinking projects, our students learn key problem-solving skills which empower them to become active agents of change who shape the future.
Educational Activism
Preferable Future

STUDENT PROJECTS

Our students made a wiki to share both locally and globally the projects they worked on to help protect the watershed. Projects included reducing trash, recycling shoes and encouraging local consumers to choose reusable shopping bags. This movie was made by a group of students who wanted to educate the community about how to reduce carbon emissions:

http://youtu.be/bX8FjA8vz9A
Educational Activism
Preferable Future

To help us continue our work we invite you to visit our wiki and share with us your thoughts or comments and information about the watershed where you live. This will help our students to evaluate the work they did and make important connections to the world around them.
